

VUYYALAWADA KIRAN

Data Science & Machine Learning Fresher

Mangalagiri, Andhra Pradesh | +91 9392279868 | nani31572@gmail.com | [linkedin.com/in/kiran-vuyyalawada-4b6640342](https://www.linkedin.com/in/kiran-vuyyalawada-4b6640342)

PROFESSIONAL SUMMARY

Motivated fresher pursuing B.Tech at Vasireddy Venkatadri Institute of Technology (2024–2028) with a strong foundation in Data Science, Machine Learning, and AI, backed by a certified programme (Grade A, 78.3%) from Medhavi Skills University via Intellipaat. Proficient in Python, SQL, and key ML frameworks, with hands-on experience building end-to-end data science projects covering EDA, predictive modelling, customer segmentation, and recommendation systems. Eager to contribute analytical and problem-solving capabilities to a forward-thinking organisation.

CORE SKILLS

Programming & Query

Python, Java, JavaScript, SQL, C

Data Science & ML

Pandas, NumPy, Scikit-learn, Statsmodels, MLxtend

Visualisation

Matplotlib, Seaborn, Plotly, Power BI

Frontend

Html, CSS, basic Java Script

Tools & Platforms

Git, GitHub, VS Code, Excel, Jupyter Notebook

Soft Skills

Communication, Problem-Solving, Teamwork, Ownership

SELECTED PROJECTS

Retail Sales Forecasting | Walmart Dataset

Capstone Project — Medhavi Skills University / Intellipaat

Python, Scikit-learn, Statsmodels, Plotly

2025–2026

- Analysed multi-outlet Walmart sales data to uncover demand patterns across stores, holidays, and seasonal periods through comprehensive EDA.
- Engineered date-based features (Year, Month, Week) and applied Label Encoding and StandardScaler for model-ready preprocessing.
- Built and compared regression models — Decision Tree, Random Forest, and Gradient Boosting — to forecast weekly sales across X future months.
- Delivered actionable inventory insights to help match supply with fluctuating demand, reducing potential stockout scenarios.

Customer Purchase Pattern Analysis | Online Retail

Capstone Project — Medhavi Skills University / Intellipaat

Python, Pandas, Seaborn, MLxtend (Apriori)

2025–2026

- Performed end-to-end EDA on an e-commerce transaction dataset to identify top-selling products globally, by country, and by month.
- Implemented RFM-based customer segmentation and a 'Buy Again' recommendation engine to personalise repeat-purchase suggestions.
- Applied the Apriori algorithm for association rule mining to surface frequently co-purchased item sets, enabling targeted cross-sell strategies.
- Developed a 'Trending Items' function delivering date-specific top-10 product rankings to support dynamic promotional decisions.

EDUCATION

B.Tech — Vasireddy Venkatadri Institute of Technology (VVIT)
Nambur, Guntur District, Andhra Pradesh

2024 – 2028
Currently Pursuing

CERTIFICATIONS

Certification	Issuing Body	Year / Score
Certificate in AI and Data Science (NCrF Level 4.5)	Medhavi Skills University, Sikkim (via Intellipaath)	2026 78.3% — Grade A

Modules covered:
Excel · Advanced SQL · Python Basics · Inferential Analytics · Python Libraries for Data Science · Machine Learning · AI · Generative AI Frameworks & Prompt Engineering · Power BI · Azure & MLOps

ACHIEVEMENTS & ACTIVITIES

- Completed a rigorous 600-mark AI & Data Science certification programme with Grade A (78.3%), demonstrating strong command of end-to-end data science workflows.
- Delivered two industry-standard capstone projects — Retail Sales Forecasting and Customer Purchase Pattern Analysis — applying ML and association rule mining on real-world datasets.
- Consistently scored above average in competitive modules including Generative AI Frameworks (82.5%), Excel (86.3%), and Python Basics (83.3%).
- Actively developing skills in Azure ML and MLOps to bridge the gap between model building and production deployment.
